Instructions for working with AI library

1. 1. You can access the AI library web application at the link below:

https://infoasst-web-denav.azurewebsites.net/

2. After loading the link, you will need to log in to the application with your university account.

- 2. If you do not have MFA authentication set up, you will need to set it up in order to use the app.
- 3. After logging in with your university account, you will see the AI chat where you can ask your questions related to the various disciplines at the university:

ගිරි MU Pleven Al Dig	ital Library		Chat Manage Con	ent Math Assistant (preview)	Tabular Data Assistant (preview)		
Work Only					🚿 Clear chat	≵ Adjust	(i) Info
	Chat	with your work	data				
Ask any	thing or try an example	ormation Assistant uses Al. Check for mistakes. <u>Transparency Not</u>					
Are t teles	here any radio copes in Australia?	What are Microsoft's primary sources of revenue?	What are some flave Breyers?	rs of			
	Type a new question (e.g. Who are Microso	It's top executives, provided as a table?)		>			
		🛫 Adjust - O Regenerate					

4. From the adjust menu, you can adjust the length of the answers that the artificial intelligence will return, as well as in which disciplines it will search for the information you are interested in:
